Question No : 1 / 1

Task:

Write a C# program that reads a student's exam score from the user and determines their grade based on the following grading scale:

- Score ≥ 90 : Grade A
- 80 ≥ Score < 90 : Grade B
- 70 ≥ Score < 80 : Grade C
- 60 ≥ Score < 70 : Grade D
- Score < 60 : Grade F

The program should use **nested if statements** to evaluate the input and print the corresponding grade.
Write the solution within the **Main** function in the `Program.cs` file.

Input Format:

- The first line of input should be an integer.

Output Format:

- The first line of output should be the **Grade** based on the score.

Refer Sample Output:

Sample Input 1

```
90
```

Sample Output 1

```
Grade: A
```

Commands to Run the Project:

```
cd dotnetapp
dotnet run
```

```
dotnet build
dotnet clean
```

Note:

The project will not be submitted if **"Submit Project"** is not done at least once.

ANSWER:

using System;

class Program
{
  public static void Main()
  {
//3 Student Grade Program
    Console.WriteLine("\n3) Student Grade Determination");
    int score;
    Console.WriteLine("Enter student's exam score:");
    score = Convert.ToInt32(Console.ReadLine());
    if (score >= 90)
    {
      Console.WriteLine("Grade A");
    }
    else if (score >= 80)
    {
      Console.WriteLine("Grade B");
    }
    else if (score >= 70)
    {
      Console.WriteLine("Grade C");
    }
    else if (score >= 60)
    {
      Console.WriteLine("Grade D");
    }
    else
    {
      Console.WriteLine("Grade F");
    }
  }
}
